

## MMP100 -Audio Project Statement

Title- "Lost in Space"

Semester/Year: Spring 2020

Software: Garage band

With this song, I wanted to create the story of an Astronaut lost in space. When he receives a message from the space Com, that unknown entity's are headed towards the lost ship.

I used two audio recording's of my voice

I used a friend 's V/O to play with the Space comm warning system.

I used the stove gas "flicker" when you put on the pilot light for building tension

And my fifth element was a coffee grinder , grinding beans to simulate the unknown Entity drilling into the "ship"

I played with voice manipulation for the space comm as well as a reversal of my recording to simulate the possion and or abduction of our main protagonist.

I hope that this track conveys a story of a man lost in space who encounters something otherworldly and the arc of something that has infiltrated the ship and is now on its way back to earth.

-Thank you!

Michael-John Pobuda.
